*Aquaculture Chemicals & FDA Approved Drugs*

**FINQUEL MS-222**

**FDA Approved Tricaine Methanesulfonate**

Finquel is a highly versatile anesthetic for temporary immobilization or sedation of fish and other cold-blooded aquatic animals.

Fish receive the Finquel dose by adsorption across the gill tissue; degree of sedation or anesthesia is easily varied for a wide variety of fish handling applications, including: spawning, marking, tagging, sorting, transport, surgery, and scientific research.

**ARGENTYNE**

**Buffered PVP Iodine Disinfectant**

Argent invented Argentyne in 1978 to serve the growing demand for a high quality pH 7 buffered salmonid egg disinfectant. Today, Argentyne is preferred by hatchery managers nationwide for its high potency USP Grade PVP Iodine that keeps killing after other brands stop.

**Contains 10% PVP Iodine** equal to 1% free iodine. Argentyne may be diluted 1:100 for a 100-ppm free iodine solution.

**U.S.A. - EARLY BOOKING DISCOUNTS - SPRING 2005**

*Nutritional Supplements, Artemia & Larval Feeds*

**CYCLOP-EEZE® Aquatic Nutrient**

*For First-Feeding and Dietary Supplementation*

**CYCLOP-EEZE®** are 800µm size micro-crustacean containing the highest know levels of carotenoids, omega-3 fatty acids, and attractants. **CYCLOP-EEZE®** has 100 times more Astaxanthene than Artemia, and 40 times more Omega-3 fatty acid:

- ❶ 3,000-7,500 ppm Astaxanthene
- ❷ 11% DHA & 11% EPA Omega-3 Fatty Acids
- ❸ Feed directly to larvae and juvenile fish
- ❹ Add to starter and broodstock diets

**Use in North American Fish Hatcheries** for supplemental feeding of: Salmonid, Walleye, Perch, Redfish, Sturgeon, Stripped Bass, Large Mouth / Small Mouth Bass, and marine species. Supplement diet with 15-25% *Cyclop-eeze®* in larval stage, followed by 5-15% in the fry stages.

**Benefits for Hatchery Fish Production**

- ◆ Attracts and incites the entire population to feed aggressively - *Size distribution is more uniform*
- ◆ Produces maximum functional integrity of tissue membranes - *Physiological performance is maximized*
- ◆ Improves stress tolerance and non-specific immune response functions - *Frequency of ailments reduced*
- ◆ Enhances reproductive development and viability of offspring - *Hatchery fish quality increases overall*
- ◆ Provides rapid long lasting natural pigmentation of eggs, fins, and skin tissues - *Fish are more highly valued*

**DEEP-FROZEN CYCLOPS-EEZE®**

For replacement or co-feeding of live feeds. 750-gram (7' x 10' x 0.65") blocks, vacuum sealed

<u>Packing</u>	<u>SALE Price</u>
